

# Elevate Your Production with Our Energy Efficiency Rebate

Join the sustainability revolution in cannabis and hemp processing with Root Sciences' Energy Efficiency Rebate Program. Invest in our cutting-edge Membrane Nanofiltration technology and enjoy significant cost savings.

Many public utility districts (PUDs) across the nation are offering significant rebates, in some cases up to 90%, on the purchase price of high-efficiency equipment. Our X-Spiral systems use far less energy than traditional solvent recovery systems, so they qualify for these rebates. We can help you navigate the process to ensure you receive the maximum rebate possible from your local PUD.

## Discover the Power of the X-Spiral

**Energy Efficiency:** Drastically reduce your energy bills.

**Eco-Friendly:** Align your business with sustainable practices.

**Cost Savings:** Enjoy significant financial benefits with our exclusive rebate offer.

## Partner with the Best

Root Sciences, a global leader in cannabis and hemp processing technology, is committed to your success. Let us help you design, upgrade, and optimize your facilities for peak performance.
